## Relevant Experience

**TWIG Finance** • Dubai UAE | Full-time

Senior Frontend Developer Jul 2023 - Oct 2023

- Responsible for adding new features by understanding the process and workflow of the feature and implementing them using Next.js.
- Responsible for creating new pages for the customer portal dashboard, and creating reusable components using the latest technologies like Next.js with Typescript, Redux-toolkit, and Tailwind CSS.
- Worked on Increasing SEO optimization and web app performance using methods like lazy-loading, code splitting, caching, asset optimization, and using semantic HTML for better accessibility.
- Experience in implementing role-based authentication and role-based page access by utilizing the CASL library.
- Worked on the test cases for the developed features for the QA team to test them properly.
- Helped in the deployment of the front end to the production and sandbox environment using the pipeline to automate the deployment.

**Wecover** • Dubai UAE | Freelance

Senior Frontend Developer Apr 2023 - May 2023

- Contributed to the end-to-end development of the company's web applications. This involved designing, developing, and maintaining the frontend components, along with integrating and managing the database using technologies like Next.js, Node.js, and MongoDB.
- By utilizing Node.js and frameworks like Express.js, I engineered the server-side logic to handle data processing, user authentication, and API integrations.
- Responsible for creating new pages for the company website and admin dashboard, and creating reusable components using Next.js and React.js.
- Experience in working on long forms and validations using the react-hook-form library.
- Experience in optimizing SEO and web app performance using multiple methods like lazy-loading, code splitting, asset optimization, and using semantic HTML for better accessibility.

**Hala Insurance** • Dubai UAE | Full-time

Frontend Developer Aug 2019 - Mar 2023

- Experience in full-stack web development, including the design and implementation of company websites and web applications.
- Hands-on experience with large-scale Angular-based SaaS projects for insurance companies, including the development of admin panels and dashboards.
- Experience in creating performant web applications for motor claims and recovery, with a focus on delivering a seamless user experience.
- Proven experience in designing and implementing robust RESTful API backends for web applications using technologies such as Node.js, Express, and MongoDB.
- Proficient in integrating backend APIs into front-end web apps, utilizing technologies such as Angular and React.js.
- Responsible for the development and maintenance of new pages on the company website, utilizing server-side rendering using React.js for SEO optimization and improved page load and app performance.
- Worked on internationalizing websites for multiple languages, including Arabic and English using i18n and i18next react technologies.

**TheDroid.io** • Bengaluru | Full-time

Full Stack Web Developer Feb 2018 - Jun 2019

Backend Developer Mar 2018 - Feb 2019

- Expertise in full-stack web development, with a focus on designing and implementing robust RESTful API backends for web applications using technologies such as Node.js, Express, MySQL, and MongoDB.
- Worked on dynamic front-end admin dashboards using technologies like Angular, ensuring a seamless user experience.
- Experience in integrating backend APIs with front-end web applications.
- Successfully deployed multiple production-ready front-end web applications using technologies like AWS, Google Cloud, and Firebase.
- Skilled in developing and maintaining databases and schema structures using MySQL and Sequelize.js, ensuring data integrity and efficient query performance.
- Expertise in deploying backend applications in both development and production environments using technologies such as Google Cloud, and Docker.
- Experience in creating and inserting SSL certificates to secure domains, ensuring data security.

## Skills

### Frontend

Angular 13+, React.js, Next.js, TypeScript, JavaScript (ES2015+), HTML, CSS, SCSS, Bootstrap, Tailwind CSS, Flex Layout, Web Responsive

### Backend

Node.js, NPM, Express, Restful API, Sequelize.js, MongoDB, MySQL, SQL, Firebase

### Tools & Platforms

Git, Github, Lodash.js, JONN, Google Cloud, Docker, Figma, Adobe Photoshop, Wordpress, Netlify, Webpack

## Education

Government College Of Engineering And Technology Bikaner, Rajasthan

Bachelor of Technology - BTech • Computer Science

2014 - 2017

**(Dropout)**

## Languages

- Hindi – Native or Bilingual
- English – Fluent
